*EIA Saffrey report Yr 1-3

The North East of England is a welcoming home where people can live, work and create world class TV and film production.

We are the fastest growing region in the UK for screen industries and will continue to work with our brilliant partners to create a fairer, greener and more inclusive sector for all.

We'll continue to back our homegrown talent and stories that showcase the rich diversity of our region, championing the crews and businesses who make it happen.

Thank you to all our Local and Combined Authority, Working and Steering Group members, our industry partners and all our beneficiaries for working with us to achieve the impacts in this report.
